Average correlation coefficients & Pesaran (2004) CD test

Variables series tested: govsize

Group variable: pref

Number of groups: 318

Average # of observations: 7.99

Panel is: unbalanced

Variable	CD-test	p-value	corr	abs(corr)
govsize	460.50	0.000	0.727	0.758

Notes: Under the null hypothesis of cross-section
independence $CD \sim N(0,1)$
